

Year 2 NUS Data Science and Analytics student pursuing a second major in Computer Science, with a GPA of **4.55/5.00**. Interested in machine learning, applied analytics and software engineering; experienced in building data pipelines and Python-based applications through coursework and projects.

EDUCATION

National University of Singapore (NUS) Aug 2025 — Expected May 2029
Bachelor of Science (Honours) in Data Science and Analytics; Second Major in Computer Science
GPA: 4.55/5.00 **Year 2** Relevant coursework: Data Structures and Algorithms, Probability, Linear Algebra, Programming Methodology

TECHNICAL SKILLS

Programming	Python, Java, SQL, R, JavaScript
Data & ML	pandas, NumPy, scikit-learn, PyTorch, Matplotlib, Power BI
Software & Tools	Git, GitHub, Flask, PostgreSQL, Jupyter, Docker
Foundations	Data structures, statistical modelling, regression, REST APIs

EXPERIENCE & PROJECTS

Data Analytics Intern May 2026 — Aug 2026
Example Data Solutions Singapore

- Cleaned and joined 120,000 retail transaction records using Python and SQL to support sales and inventory analysis.
- Automated weekly KPI reports, reducing preparation time from 4 hours to under 1 hour.
- Built a Power BI dashboard tracking sales trends and stock-outs, with feedback from five internal stakeholders.

Singapore Bus Arrival Prediction Mar 2026 — Jun 2026
Independent Data Science Project Python, scikit-learn, pandas

- Engineered time-of-day, route and historical delay features for a supervised bus arrival-time prediction model.
- Compared linear regression and random forest baselines; achieved 15% lower test MAE than a simple historical-average baseline on sample data.

Student Course Planner Web Application Aug 2026 — Present
Team Software Engineering Project Flask, PostgreSQL, JavaScript

- Co-developed a web application that helps students organise modules, track prerequisites and check timetable clashes.
- Implemented REST API endpoints and database queries, and wrote automated tests for timetable validation logic.

Recycling Image Classification Jan 2026 — Apr 2026
Personal Machine Learning Project PyTorch, Python

- Trained a transfer-learning image classifier to distinguish paper, plastic and metal waste in a sample labelled dataset.
- Evaluated performance using confusion matrices and class-level precision and recall; documented common failure cases.

LEADERSHIP & ACTIVITIES

Peer Learning Facilitator, Student-led Python Study Group Jan 2026 — Present
Organised beginner Python revision sessions and supported peers with debugging and basic algorithmic problem-solving.

Participant, University Data Hackathon Mar 2026
Collaborated in a four-person team to prototype a data dashboard for monitoring campus energy consumption.
